

1. Cut the square out.

2. Fold the square in half diagonally along line and unfold it. Do the same along the other diagonal.

2. Fold the square in half along the line from top to bottom and then unfold it. Now fold from left to right and unfold.

4. Fold each of the four corners to the middle. Now, flip it over so the number side is face down.

5. Fold each of the four corners to the middle again.

8. Now for the tricky part! Using both hands, put your index fingers and thumbs under the flaps and push them into the four corners. Bring the points together. Now you are ready!
